

April 21, 1958

Oil Conservation Commission
1000 Rio Brazos Road
Aztec, New Mexico

Gentlemen:

Northwest Production Corporation Well 1-4, Blanco 30-12, which is located in the NE/4 Section 4, Township 30 North, Range 12 West, San Juan County, New Mexico, a dual Fruitland-Mesaverde completion, is now shut in following annual deliverability test. Shut-in pressures are scheduled to be taken April 23, 1958.

Following the shut-in period the Fruitland formation will be produced one week with the Mesaverde side shut in. Both sides will be shut in the following week after which time the Mesaverde will be produced for one week with the Fruitland shut in.

It is proposed to accomplish our packer leakage test according to this schedule.

Very truly yours,

NORTHWEST PRODUCTION CORPORATION

Ray Phillips, Manager
Production Operations
