The Mesa Verde zone was permanently plugged and abandoned in the subject well between October 1, 1976 and October 6, 1976 in the following manner:

Worked packer loose and pulled tubing.

Spotted 120 sk. cement plug in the open hole section to fill back to 3820' inside 5 1/2" liner. Topmost perforation at 4578'.

Waited on cement. Ran tubing back in hole and landed below the Fruitland. Swabbed Fruitland zone in.

The well will be tied back in to determine if it is capable of sustaining production. If so, it will be classified as a single producer in the Flora Vista Fruitland section.
