This well was producing approximately 2/3 BOPD and was not economical to operate. U.S.G.S. approval to shut in this well was dated 5-8-67. The well was shut in Sept. 1969.

This well is in a large Unit which is now under waterflood operations. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from this reservoir.
