Production supported by this well makes it uneconomical to operate. This well was shut in 6-12-70. U.S.G.S. approval was dated 6-25-70.

This well is in a large Unit which is now under waterflood operations. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from this reservoir.
