RECEIVED  
JUL 13 1958  
OIL CON. COM.  
DIST. 3

The elevation of the ground above sea level is 9045 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

This well was drilled to a total depth of 1844' where an excellent show of oil was encountered in the Sabota formation. Due to an unrecoverable fish in the hole it is intended to abandon this well by spotting 15' at cement from 1820' to 1835', 10' at from 1835' to 1840', 8' at from 1840' to 1845' and 4' at the surface. The Navajo C-2-E will be drilled 30' to the east of this location. There was no sale of oil from the Navajo C-1.
