If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well was shut in 5-31-67 in order to evaluate effectiveness of injection on east side. U.S.G.S. approval was dated 5-24-67.

This well is in a large Unit which is now under waterflood operation. Future plans are to conduct waterflood and tertiary recovery studies. These studies may result in a revised waterflood plan or in a tertiary recovery program that may require the use of this well in order to recover the maximum amount of oil from this reservoir.
