13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

In the process of workover operations to preform a casing leak repair and Menefee/Cliffhouse payadd it was discovered that the existing 4-1/2" production casing was in need of replacement. We attempted to call both Jim Lovato and Steve Mason to request verbal permission to alter our casing leak repair procedure for the Kernaghan B #1. Both are out of the office until next week. This is to advise that we determined to proceeded to repair the casing leak as follows:

We have cutoff the 4-1/2" production casing at 4173'. A CBL indicated we had cement isolation in the new 4-1/2" X 7" liner lap area and the liner lap pressure tested.

New Plan: Instead of squeezing the 7" casing leak, we will rerun and cement 4-1/2" casing as per the following.

14. I hereby certify that the foregoing is true and correct.
