To be furnished

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate round the jobs, cementing points, and all other important proposed work)

The objective sands are the Cliff House and the Point Lookout expected at about 4900' and 5425' respectively. The casing program is as follows:

175' 10 3/4" O. D. casing cemented to surface
4900' 7" O. D. casing cemented with 200 sacks

Well will be drilled using rotary tools to top of Cliff House. Pay Zone will be drilled with rotary tools using natural gas drilling in method to a total depth of about 5700'. Well will be shot using approximately 1800 quarts of nitro from 4950 to TD.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
