Dear Herman:

The Northwest Gas Schedule is showing the captioned well to have a deliverability of 140 MCFPD.

Our records show the later 1974 test to reflect a deliverability of 304 MCFPD.

I think the later test should have been in effect since April 1, 1975.

I do not find a copy of the machine list of deliverabilities for 1974 to check it out.

Please check this out and let us know what the situation is.

Yours very truly,

A. R. Kendrick
