(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

September 22, 1952, 19\_\_\_\_

Well No. 1 Seymour is located 990 ft. from N line and 1690 ft. from E line of sec. 25  
NE 1/4 Section 25 31 North 9 West T.1N.2E.  
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian) New Mexico  
Elanco San Juan County  
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft. To be furnished

### DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

The objective sands are the Cliff House and Point Lookout, expected at 5200 feet and 5600 feet respectively. The proposed casing program is as follows:

175' of 9-5/8" O.D. casing cemented to top  
 5200' of 5 1/2" O.D. casing cemented with 200 sacks  
 Well will be drilled with rotary tools to the top of the Cliff House, and the pay sands will be drilled with rotary tools using natural gas method to a total depth of about 5800'.

Well will then be shot with about 1800 quarts of nitro glycerine from 5250 to total depth.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
