The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

The objective sands are the Cliff House and the Joint Leachout, and their respective tops are expected at 5175 and 5775 feet. The casing program is as follows:

- 175' of 9-5/8" O.D. casing cemented to top
- 5175' of 5 1/2" O.D. casing cemented with 200 sacks

Well will be drilled with rotary tools to the top of the Cliff House at about 5175' and the pay sands will be drilled with rotary tools using natural gas method to a total depth of approximately 5790'.

Well will then be shot with about 1800 quarts of nitro from 5225 to total depth.

I understand that this plan of work must receive approval in writing by the Geological Survey before
