Basin Dakota San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

RECEIVE

APR 4 1963

The elevation of the derrick floor above sea level is 6676 ft. G. L.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogs, color cementing points, and all other important proposed work)

U.S. GEOLOGICAL SURVEY
FARMINGTON, NEW MEXICO

Original intention called for 8200' of 4 1/2" casing cemented w/200 sks-40% Diacel "D" followed by 75 sks 2% gel cement.

We propose to alter this program as follows:

Run 5 1/2" 15.5# J-55 casing to approx. 7500' and cement w/150 sks to protect Mesa Verde.

Run 4" 11.60# liner from bottom of 5 1/2" to T.D. and cement w/approx. 175 sks.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations shall be commenced.
