U. S. GEOLOGICAL SURVEY
SARASOTA, NEW MEXICO

July 6, 1960

Well No. 99-24 is located 1160 ft. from N line and 990 ft. from E line of sec. 24
NE/4 Section 24 31E 74 R10N
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco Mesaverde-U. Los Pinos San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6471 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Due to extreme difficulties experienced in drilling below the base of the Mesaverde Formation, we plan to complete this well as a single completion Mesaverde well.

We plan to set approximately 9900' of 5 1/2" 15.50# J55 casing and cement the Mesaverde Formation, perforate the Mesaverde Zone and sand-water fracture with approximately 100,000 gallons water and 75,000 lbs. sand and set 2-3/8" 4.7# J55 tubing at approximately 5000'.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
