DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is intended:

1. To gas drill a 5" directional hole starting in the Cliff House formation, and through the Point Lookout formation, and to treat the producing interval with the Sani-oil process. The hole will be deviated approximately 30°.
2. To gas drill a 5" straight hole starting in the Cliff House formation and through the Point Lookout formation, and to treat the producing interval with the Sani-oil process.

This work is for experimental purposes.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
