Gentlemen:

Based on our analysis of Supplement Northwest 2164 of June 7, 1957, and production and allowable histories subsequent to that time for the San Juan 32-9 No. 14 Well, A-9-31N-9W, it would appear that the July 31st 1957 status should be (-)10,305 MCF rather than (-)4,376 MCF as appears on the September 1957 schedule.

If these figures are not correct or you have any questions regarding this, please advise us.

Yours very truly,

D. H. Rainey
