San Juan County, New Mexico

Gentlemen:

The above referenced well is a Mesaverde/Dakota commingle. Attached is a copy of the allocation for the commingling of the subject well completed on November 8, 2001. DHC473az was issued for this well.

Gas: Mesa Verde 91%
Dakota 9%

Oil: Mesa Verde 0%
Dakota 100%

These percentages are based upon reserves assigned to each formation founded on production from the respective formations before and after workover operations. Because an increase was not seen in condensate production with the addition of the Mesaverde formation, condensate remains allocated solely to the Dakota formation. Please let me know if you have any questions.

Sincerely,

Peggy Cole
Regulatory Supervisor

Bureau of Land Management

Production Allocation Documentation

Nye SRC #14

Production Allocation

Based on Remaining Reserves

Mesaverde Recomplete December 2001

GAS

	<u>RR</u>	<u>Allocation %</u>
Dakota	129.9	9%
All	<u>1,416.0</u>	
Mesaverde	1,286.1	91%

Condensate

Because an increase was not seen in condensate production with the addition of the Mesaverde formation, condensate remains allocated solely to the Dakota formation.
