#### I. Any temporary abandonment request must include the following:

A. Justification of the reason the well should be temporarily abandoned rather than permanently plugged and abandoned.

B. A complete record of perforations in the well casing.

C. Provide for the installation of a bridge plug (within 50' to 100' of the top perforation) or a cement plug that extends at least 50 feet above each set of open perforations and the well bore filled with conditioned, non-corrosive fluid and shut-in at the surface. If a bridge plug is used, it must be capped with cement. The cement cap must be a minimum of 35 feet of cement if placed by dump bailer or, 50 feet of cement if spotted by tubing.
