is non existent.

Tentatively the plan to permanently plug and abandon well is to provide a conductor pipe of 2 3/8" EUE tubing from the top of the 3 1/2" drill pipe to surface. Perforate the 3 1/2" drill pipe @250' and cement down the 2 3/8" tubing and 3 1/2" drill pipe and circulate cement back to surface filling the annulus between the drill pipe and 9 5/8" surface casing. Conditions of well may require revisions to this procedure.

Extended until July 14, 1985.
