Re: Apperson #1 K-30-T30N-11W
 Kaempf SWD #1 N-19-T30N-11W

Dear Mr. Calvin:

The Apperson #1 location has been cleaned up satisfactorily. Subsequent inspection has discovered that the mouse hole of this well has caved in and poses a safety hazard. Please have this problem remedied.

The records for the Kaempf SWD #1 do not indicate that a packer has been lost in the well. We do not consider the well plugged and abandoned, only temporarily abandoned without approval. As the well is not usable, it should be plugged in accordance with a division approved program.

If you have any questions, please contact this office.

Yours truly,

Frank T. Chavez
District Supervisor
