(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting and proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

It is intended to dually complete this well by pulling the tubing and setting a drillable bridge plug above the Mesa Verde perforations. The casing will be tested to 3500 psi, and the Pictured Cliffs formation selectively perforated and sandwater fractured. Following clean out, dual tubing strings will be run and the producing formations isolated with a production packer.

Attached is a well location plat showing the dedication of the Pictured Cliffs formation.
