Re: Nye 3-A P-1-30N-11W

Dear Smitty;

The annual packer leakage test on the referenced well indicates communications between the producible zones. In order to comply with Rule 112-A and the order authorizing the multiple completion, you are hereby directed to take immediate remedial action.

If you feel this test is not conclusive and the well may not have mechanical problems, schedule a retest and I will be glad to witness it.

Very truly yours,

A handwritten signature in cursive script, reading "Charles Gholson".
