Re: Downhole Commingling Application
Allen Com Well No. 1A

RECEIVED
JUN 24 1997

OIL CON. DIV.
DIST. 3

Dear Ms. Bradfield:

I have reviewed your application to commingle Blanco-Pictured Cliffs and Blanco-Mesaverde Gas Pool production within the Allen Com Well No. 1A, located in Unit E of Section 16, Township 31 North, Range 9 West, NMPM, San Juan County, New Mexico. It appears that the Mesaverde interval is capable of producing at approximately 461 MCFG per day, and that the Pictured Cliffs interval has the potential to produce at a high rate as well, as evidenced by offset Pictured Cliffs production.

The Division does not consider this type of production to be marginal. If you have any other supporting data to justify your request, please submit. In the event no additional data is submitted, your request will be denied. If you wish to pursue the application at a hearing, please advise.

Sincerely,

David Catanach
Engineer
