Re: Fee #4, I-4-30N-11W

Gentlemen:

It has come to our attention that APD and plat on the above well were filed with the footage location of 1816 FSL and 825 FEL. However all reports filed after approval of the application show the location 1400 FSL and 1190 FEL.

If the footage location of this well was changed before drilling, please see that a sundry (C-103) is filed with this office immediately, with a corrected plat. The sundry to show request to change the location.

Upon checking with Geoelectric, they have three plats in file. One each for the above locations and one that shows 1450 FSL.

Please see that this is taken care of as soon as possible and if you have any questions call me.

Sincerely,

Luanne Hisel

cc: Well file
