Re: Sun Oil Company  
New Mexico Federal N #2E  
D-17-30N-12W

Dear Mr. Maness:

We are in receipt of your approved application to drill the referenced well. Due to concern about the possibility of pollution within the drainage area of the Farmington Lake reservoir, this office is requiring that operators line their mud pits and construct dikes around tanks which are located within the drainage area. The referenced well is located within this area. The dike around the production tank will form a reservoir with a capacity one third larger than the capacity of the enclosed tanks. Please notify this office when the tank dike is completed so that we may inspect it.

If you have any question, please call.

Yours truly,

A handwritten signature in cursive script, appearing to read "Frank T. Chavez".
