Request Long Term Shut-in

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Wexpro Company requests permission to shut-in the above captioned well under the guidelines for long-term shut-in wells. The Stevens Well No. 1 is approximately two miles from the nearest gas sales line, and the production test indicates that the well cannot produce adequate gas volumes to make the pipeline a commercial venture at this time. Also the well lacks a sale agreement in any form. It is the Wexpro Company's request that the Stevens Well No. 1 be shut-in until such time that subsequent drilling could allow for significant gas volume to justify the pipeline. The previous approval for shut-in expired on August 17, 1990.
