Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent dates, including estimated date of starting any proposed well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to th

Plans are to bury a power supply cable 12 to 18 inches in the ground from a proposed, above ground, power line located in the NW1/4 SE1/4, Sec. 33, T. 31 N., R. 7 W. to the NEBU 54A well location, as shown on the attached map. The purpose of this undertaking is to provide electric power to the NEBU 54A cathodic system. The cable will be routed parallel to an existing Williams Field Service pipeline and will be 10 -15 feet from the pipeline. No right-of-way clearing will be required and the cable will be plowed in with the use of a ripper tooth on a ditch witch. All surface disturbance will be confined to the existing 50 foot right-of-way. The project will be on Bureau of Reclamation lands and will be 990. feet in length. An archeological report 81-SJC-121, dated May 21, 1981, was prepared for the pipeline right-of-way (Grant No. NM 45919), and is on file with the Bureau of Land Management.
