	(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

Well production had fallen off drastically - suspected plugged tbq. Moved rig onto location on 1/18/99. Pulled tbq. - looked OK. TIH w/ retrievable bridge plug & packer & found casing leak between 131' - 162'. RU Cementer's Inc. & pumped 50 sx. of Class "B" cement w/ 3% CaCl<sub>2</sub>. Circulated cement out braden head. Shut braden head valve & squeeze cement, max squeeze pressure 1000#. Drilled out cement & pressure test casing to 1000# - held OK. Circulated hole clean. Latched onto retrievable bridge plug & TOH. Run 1-1/4" tbq. & land as before. Swab well to kick off. Release rig & return well to production on 1/22/99.

14. I hereby certify that the foregoing is true and correct

Signed
