13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to complete the Mesa Verde formation in this wellbore and, if successful, produce it along with the Dakota.

We plan to set a bridge plug above the Dakota perforations at 6,000'. The Mesa Verde will then be perforated in acid at 4306'-12'; 4340'-44'; 4355'-73' 2 shots per foot. The well will be fraced using a nitrogen system with 90,000# of 20/40 sand. The well will be tested and comingled with the existing production.
