☐ Final Abandonment Notice

TYPE OF ACTION

☐ Abandonment

☐ Recompletion

☐ Plugging Back

☐ Casing Repair

☐ Altering Casing

X ☒ Other: **Production Tank Spill**

(Note: Report results of multiple completion on Well
Completion or Recompletion Report and Log form.)

☐ Change of Plans

☐ New Construction

☐ Non-Routine Fracturing

☐ Water Shut-Off

☐ Conversion to Injection

13. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On 9/8/98, a production tank spill occurred due to vandalism (the load valve had been opened). The spill area was excavated to a depth of 25 feet. A depth of 42 feet was reached utilizing a Geoprobe, where bedrock was encountered. Soil samples were taken at 12 feet, 25 feet, and 40 to 42 feet, which provided BTEX and TPH concentrations below NMOCD and BLM guidelines. Soils were landfarmed on location and also on the McCord 13E location. The landfarm was tested on 8/27/99, and a composite sample provided a TPH concentration below NMOCD and BLM guidelines. See the attached for complete details.

14. I hereby certify that the foregoing is true and correct.

Signed:

Gary Brink
