If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

7-19-85 While drilling at 5350', a natural fracture was encountered making large quantities of oil and gas. It is intended to enlarge the reserve pit and blow pit as shown in the attached lay down diagram to handle the additional fluid. An archaeological survey and surface inspections have been completed. Construction followed all field inspections.
