12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) See Rule 1103.

Devon Energy was unable to remove the un-cemented Fruitland Coal 5.5" liner as planned after 20 days of rig activity. On 10/18/00 Devon requested and was granted verbal approval to sidetrack and re-drill the open hole Fruitland Coal interval. Devon's intentions are to set a 7" drillable bridge plug at 2915', (7" casing shoe at 2929' KB). The whipstock tool will be set at 2911.5'. The whipstock will have an 7' window with the bottom at 2912'. The new sidetrack Fruitland Coal open hole interval will be drilled with a 3 degrees from vertical kickoff angle.

The new open hole will be drilled with 6 1/4" bit to the top of the Pictured Cliffs formation and under-reamed if hole conditions permit to 11" in diameter. The re-cavitation process will last approximately 15 days. The new un-cemented, perforated 5 1/2" liner will be run across the open hole interval.

I herby certify that the information above is true and complete to the best of my knowledge and belief.
