12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) See Rule 1103.

Devon Energy proposes to move in a coal cavitation rig and remove uncemented existing 5 1/2" liner. The Fruitland Coal open hole interval will undergo a re-cavitation and cleanout process. The well will not be deepened. The end of the re-cavitation process, a 5 1/2" pre-drilled liner will be installed across the open hole interval and set in the 7 inch casing with a liner hanger assembly.

I herby certify that the information above is true and complete to the best of my knowledge and belief.
