13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

It is proposed to make a completion in the Pictured Cliffs formation. This well was drilled in 1990 as a potential Fruitland Coal well by Mesa. Casing was set to TD but was never perforated for a completion. Therefore, this completion in the Pictured Cliffs will be the initial completion for this well. The completion is proposed as follows:

1. Clean out hole to PBTD of 3040'.
2. Perforate the Pictured Cliffs from 2914'-2932' @ 4 jsfp.
3. Stimulate with 1800 gals of 15% HCl and sand frac with 40,000 lbs of sand.
4. RIH w/1-1/4" tubing to 2925'.
5. Place well on test.
