13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Request long term shut-in for one year. This well requires fracturing to produce commercial quantities of gas. At our current low gas prices we do not feel that this is feasible at this time. We will make every effort to place this well on production prior to the expiration of this shut-in period.
