abandon cathodic protection well

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form 1)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

Amoco Production Company plugged and abandoned the groundbed cathodic protection well previously associated with the Gartner LS #3 and #10 wells using the following procedure. The previous groundbed well was plugged because it was too near the sight of the permitted Gartner "A" #16. It is being replaced as described in a separate sundry.

1. Drilled to 300' through 10 anodes.
2. Pumped 70 sx standard portland cement to surface.
3. No marker set because of the location of the Gartner "A" #16.
