Re: Hallwood - Gilbreath #1 *N-28-30N-12W*

Dear Mr. Chaves:

We live at 5560 Franks Lane in Farmington. There is, what we would estimate to be about 1/2 mile southeast across the river from where we live, the above referenced gas well that has a very noisy compressor on location.

We recognize this is a multi use area and certain accommodations have to be made, however, it seems that this compressor is far too noisy for a residential area.

The undersigned are also affected by this monotonous drone.

We would appreciate if you could tell us if this installation is appropriate for this area and properly muffled, as it is a constant aggravation and annoyance.

Yours very truly,

Larry and LeAnn Foutz
