12. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

On May 02, 2001, Amoco Production Company submitted a request for permission to abandon the Basin Dakota and recomplete into the Blanco Mesaverde. During the process of preparing for the abandonment of the Dakota the subject well returned to production. Rather than abandon the Dakota we requested verbal permission from Jim Lavato with the BLM and Steve Hayden with the NMOCD proceed to flow test and then isolated the Dakota for completion into the Mesaverde, apply for downhole commingling authority to commingle production downhole.

The Basin Dakota (71599) & the Blanco Mesaverde (72319) Pools are Pre-Approved for Downhole Commingling per NMOCD Order R - 11363. The working, overriding, and royalty interest owners in the proposed commingled pools are identical, therefore, no notification of this application need be submitted.

Production is proposed to be allocated based on a fixed percentage. Our intent is to flow test then isolate the Dakota, completed into the Mesaverde, frac, cleanout and then run a combined flow test on both zones. The volume produced from the Dakota will be subtracted from the total flow rate to determine the Mesaverde flow rate.

Commingling Production Downhole in the subject well from the proposed pools with not reduce the value of the total remaining production. **DHC 585A2**

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
