Re: The Basin Natural Gas Corp.

Corroost #2- H4/4 25-30H-12

According to C-103 dated July 16, 1953 this well was spudded & drilled some without a Notice of Intention to Drill. His operation was subsequently shut down. Please advise what should be done with this well.

Thanking You,

I am sure this well was not drilled deeper than the 45' shown on your C-103. I believe Mr. Wambarger lost his financial backing prior to drilling out under surface pipe. I will check out the location on the ground. I believe you may as well handle it as an abandoned location.
