San Juan County, New Mexico

Gentlemen:

The above referenced well is a Chacra/Mesaverde commingle. Attached is a copy of the allocation for the commingling of the subject well completed on December 13, 2000. R11363 was issued for this well. *DAC 81A2*

Gas: Chacra 21%
Mesa Verde 79%

Oil: Chacra 0%
Mesa Verde 100%

These percentages are based upon remaining reserves assigned to each formation founded on production from the respective formations before and after the recompletion of the Chacra. Because condensate production did not change with the addition of the Chacra formation, the condensate is completely allocated to the Mesaverde formation. Please let me know if you have any questions.

Sincerely,

Peggy Cole

Production Allocation Documentation

Morris Com 102

Production Allocation

Based on Remaining Reserves

Chacra Recompletion (December 2000)

GAS

	<u>RR (MMCF)</u>	<u>Allocation %</u>
Mesaverde	630.6	79%
All	<u>793.4</u>	
Chacra	162.8	21%

Condensate

Because condensate has not changed since the addition of the Chacra formation, condensate has remained completely attributed to the Mesaverde formation.

Chacra RR = 162.75 MMSCF

Mesaverde RR = 630.63 MMSCF
