13. Describe Proposed or Compelled Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

After perforating and fracing the Point Lookout, Menefee, Cliff House, and Lewis Shale formations, the Cliffhouse proved to be an extremely wet zone with water that is not normal or native to the MV formation (blackish smelly water, we think due to proximity of injection wells in area). We intend to do a cement squeeze on perforations between 3674' and 3864', approximately 20 perfs in all. Plan on pumping 100 sks of 15.6 lb. 1.18 yeild w/ 1% CAC12.

Received verbal approval from Jim Lovato on 5/4/01.

I hereby certify that the foregoing is true and correct
