Re: Application for Non-Standard Location for
Texakoma Oil & Gas Corporation
Amoco #1R, 1693' FNL 397' FEL, H-21-30N-12W
Flora Vista Fruitland (Sand) Pool

Dear Ms. Wrotenbery:

Texakoma Oil and Gas Corporation hereby requests approval for a non-standard location for its Amoco #1R well to be located 1693' FNL 397' FEL of section 21, Township 30 North, Range 12 West, in the Flora Vista Fruitland (Sand) Pool, San Juan County for geological reasons.

The proposed well is to replace the Amoco #1 well which is located 810' FNL 880' FEL of section 21. The intent is to get as far as possible from the original well without creating a hazardous situation. The distance between wells proposed here is 1006 feet.

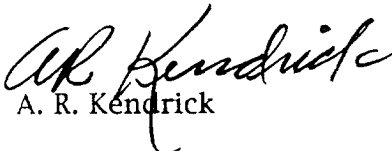

A standard location in the west-half of the northeast quarter would fall in the watershed of Farmington Lake and pose a possible contamination situation. Topography prevents the well being located farther south or southwest.

It is believed that the drilling of the subject well will be in the best interest of conservation and the prevention of waste.

All offset operators or owners as shown on the enclosed exhibit were notified of this application by Certified Mail at the same time as the mailing of this application.

If there are questions, please contact me or Texakoma Oil and Gas Corporation.

Yours very truly,

A. R. Kendrick

Enclosures

cc: Oil Conservation Division, Aztec, New Mexico
Offset owners as listed via Certified Mail Return Receipt
Texakoma Oil & Gas Corporation

Enclosures

- Form C-102, Well Location and Acreage Dedication Plat, for the subject well.
- Copy of topographic map of section 21, Township 30N, Range 12W showing the existing and proposed wells within the section; the topography on the east side of Beeline Reservoir, now known as Farmington Lake; a natural gas pipeline and the canal which delivers water to the lake in the eastern portion of the northeast quarter of section 21.

Farmington Lake is a municipal recreation area for and by the city of Farmington. This location is low enough that the surface production equipment will be below the sight-line from the surface of Farmington Lake and most of the recreation area.

- A detailed layout of the wells in the northeast quarter of section 21.
- A map showing the Cumulative Production of gas from Fruitland Sand completions in and near the Flora Vista-Fruitland Sand Pool.
- The recent (18-months) production history of the monthly and average daily gas production from the Amoco #1 well.
- A plat showing the nearby owners of gas wells surrounding the subject well.
- A list of offset owners names and addresses notified of this application.
