Re: El Paso Nat. Gas #3-A Sellers  
Section 30-30N-10W

Att: Mr. Warren Mankin

Dear Warren:

This well was previously approved as a dual completion by DC Order #301. The Packer test indicated that the zones were not separated and the well was worked over and the packer re-set. Further packer tests showed that the zones were still not separated so the operator has plugged off the Mesaverde formation and the well is now a Pictured Cliffs completion only.

Yours very truly

Emery C. Arnold  
Supervisor, District #3

Attn: Mr. Warren Markin

Dear Warren:

This well was previously approved as a dual completion by DC Order #301. The packer test indicated that the zones were not separated and the well was worked over and the zones re-set. Further packer tests showed that the zones were still not separated so the operator has plugged off one reservoir formation and the well is now a finished single completion only.

Yours very truly

Ernest C. Arnold  
Superintendent, District #3
