Please reference telephone conversation on May 17, 2002, between representatives of BP America and Steve Mason, BLM and Charlie Perrin, NMOCD, regarding bringing various inactive wells into compliance.

BP is in the process of re-evaluating the production potential in the entire Carracas Canyon Unit. The subject well will most likely need artificial lift in order to maintain production. Equipment has not arrived for installation therefore, we request additional time to finish the field wide evaluation and installation of the surface equipment necessary to restore production. In order to bring the well into compliance pending the installation of surface equipment we have proceeded to perform a casing integrity test as follows:
