(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

October 20, 1961, 19.....

San Juan 32-5 Unit
Well No. 1-22 is located 170 ft. from [S] line and 103 ft. from [E] line of sec. 22
SE/4 Section 22 #2-North 6-West N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Basin Dakota Rio Arriba County New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 6,331 ft.

This supersedes notice of intention to drill well in NE/4 of Sec. 22 filed with O.C.C. - Aztec on 9/12/61

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Dakota Test. East half Section 22 (320 acres) dedicated to this well.
Casing Program: 600 ft. 8-5/8" 24# casing - set with 250 sacks cement, circulated to surface.
5-1/2" - 15.5# J-55 casing - set on bottom - about 8100 ft. - cemented with 200 sacks. Mesa Verde will be protected - use of 2 stage tool and about 200 sacks of cement.
If commercial production indicated, well will be perforated and sand fractured - and 2-7/8" E. U. E. tubing will be set about 20 feet off bottom.

Application for approval of the unorthodox location being processed by Oil Conservation Commission in Santa Fe - necessary due to proposed lake behind Navajo Dam.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
