New Mexico

(State or Territory)

The elevation of the derrick floor above sea level is **5499.7** ft.

Plugged back 1909-1960 w/40 gallons pea gravel and 1960-1946 w/18 gallons Calceol.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Attempted to treat Lower Gallup 1908'-1946' after plugging back, using Lyons Seal-Seal formation packer on 2-1/2" tubing. Had communication around packer when set at 1898'-1908' and 1913'-1923'. Abandoned attempt to treat Lower Gallup zone. Well returned to production from open hole 1739'-1946' Gallup. No change in status. Pumped 11.60 BOPD -0- water 2-25-58.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company **Tennessee Gas Transmission Company**
