Ute Mountain Tribal

Farmington, New Mexico January 11, 1962

Well No. 3 is located 1980 ft. from S line and 1990 ft. from E line of sec. 34
31/4 of Section 36 T-31-N R-15-W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Verde Gallup San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5494 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

As a result of Ute Mountain Tribal Well No. 3 ceasing to produce oil in commercial quantities we propose to plug and abandon this well as follows:

1. Spot 20 sacks neat Incon cement on bottom (approximately 22" fill up) and squeeze with minimum pressure to leave perforations covered with cement.
2. Fill hole with fluid.
3. Pump 25 sacks cement down 5-1/2" - 8-5/8" annulus (approximately 14" fill-up to anchor pipe).
4. Remove all well head and surface equipment.
5. Spot 5 sacks cement for surface plug (0-40") and erect dry hole marker.
6. Plug and abandonment by above procedure to permit possible re-entry for future use.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
