The elevation of the Sally Bushong Ally's Alley above sea level is 5605 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights and lengths of proposed casing; indicate mudding jobs, cementing points, and all other important proposed work)

We propose to drill a well at the above location through the Tocito formation to an approximate total depth of 2630'. We will set and cement to the surface 90' 3-5/8" 24# J-55 casing with 75 ax.
Estimated formation tops are as follows: Mancos Shale - 1260'; Tocito - 2545'. Correlation log will be run at 2500' and 5-1/2" 14# J-55 casing will be run to approximately 2530' and cemented with 100 ax. The Tocito will be cored using crude as drilling fluid.
All work to be done in accordance with the Rules and Regulations of the 1956 and the New Mexico Oil & Gas Conservation Commission.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
