Due to the packer leakage indicated in subject well test of September 29, 1973 the well is to be entered and the non-commercial Mesa Verde zone cemented off.

We propose to pull tubing, set a bridge plug at 4700' and cement the perforations 4635 - 43 and 4646 -70 with 100 sacks.

Drill out retainer, cement, bridge plug and model "D" packer and return the Dakota to production.
