(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Aug. 27, 1957

Well No. 5 is located 990 ft. from N line and 990 ft. from E line of sec. 35

NE 1/4 NE 1/4 sec. 35 31 N 9W N.M.P.M.
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)
Blanco-Mesaverde San Juan New Mexico
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 5996 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Tubing was pulled and open hole cleaned out with gas to a depth of 4955 ft. at which depth drill pipe stuck. In attempting to free drill pipe, stripped threads on the bit sub, leaving bit and bit sub in hole. Due to hole being wet and danger of sticking fishing tools, proposal is made to set retained at 4365, squeeze cement, drill out to approximately 4450 ft. whipstock and drill new 6-1/4" hole to approximately 5200 ft.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
