DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We request permission to temporarily abandon the above well. Following fracture treatment on the initial completion we have not recovered all of the lead oil. The well is presently capable of producing approximately 1/8 BOPD. We do not want to permanently plug this well as it probably will be used for a water injection well when we start water flooding this field.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
